Logansport Municipal Utilities

Logansport Municipal is one of two Utilities to receive an award of Service to their Community at the IMEA Spring Conference & Business Meeting Awards Banquet held on Thursday, May 16, 2019.

The electric system was purchased by the City of Logansport in 1894. At that time, generators turned by waterpower provided the electricity. With over 125 years of service to the Community LMU was established to provide the city and surrounding community with reliable electric, water and wastewater. It is now a shining example of a municipally owned utility that provides prompt, friendly, and professional service.

IMEA Board & Staff are proud to present the 125 Years of Service Award to both Logansport Municipal and a Century of Service Award to Darlington Light and Power.
