

## Safety Message of the Day for IMEA Members

### Emergency Preparedness Safety Message

Train your workplace to be prepared for any type of emergency. Emergencies, by nature, can happen at any moment. Therefore, you can't exactly plan for them. You can, however, prepare for them. The more prepared you are for a workplace emergency, the more likely you are to avoid any serious consequences. A workplace emergency can be anything from a HazMat contamination to an active shooter situation and yes, trains are responsible for many injuries and property damage incidents every single year. Look at what happened in Ohio, what would you do if that happened in your community.

Emergency preparedness training can ensure your employees safety in any situation.

FYI - Many derailments occur at or near crossings, so just some "food for thought", how close do you want to be to that crossing?
