

Safety Message of the Day for IMEA Members

Articulating Boom Platforms (bucket trucks) Safety Message

Lift controls shall be tested each day prior to use to determine that such controls are in safe working condition.

OSHA

1926.453(b)(2)(i)

Lift controls shall be tested each day prior to use to determine that such controls are in safe working condition.

NOTE: Lower level controls shall not be operated unless permission has been obtained from the employee in the lift, except in case of emergency.

We know they get used when we perform bucket rescue training; however, we don't do that training DAILY!
