

## Safety Message of the Day for IMEA Members

### Maintain Your MAD (Minimum Approach Distance) Safety Message

Your body is part of the circuit if you get too close.

1. Know your voltage and the corresponding MAD for that class.
2. Use insulating tools and equipment rated for the voltage.
3. Watch your reach: hands, elbows, long tools, and conductive clothing items.
4. Don't bypass MAD just to "get it done." No job is worth your life.
