

Safety Message of the Day for IMEA Members

Cover first - then move

Cover- up isn't optional and it isn't decoration - it's your working clearance. Before climbing, reaching, or repositioning, stop and ask: What can I contact if I slip, shift, or get bumped? Install cover to protect against the unexpected, not just the obvious. If you have to move cover to work, pause and reset before continuing.

Crew check: What's the first piece of cover going up today?

***Our goal is simple - no surprises, no shortcuts, and everyone goes home
If conditions change, we stop and reset the plan***
