

Safety Message of the Day for IMEA Members

Emergency Response Begins with Your Safety

When responding to an emergency, remember that your safety comes first. Whether it's a storm, downed power line, vehicle accident, or electrical equipment failure, take time to assess the situation before taking action. Identify potential hazards, establish a safe work area, and communicate with your crew. Rushing into a dangerous situation can turn one emergency into two. You cannot help others if you become a victim yourself.
